IMPORTS AND EXPORTS

FOR THE YEAR

1920.

PREFATORY NOTE.

ALL TABLES relate to the Calendar Year.

The "**Imports for Home Consumption**" include goods entered for use in the Colony at the time of importation, and goods cleared for home use ex warehouse.

The imports statistics do not include :—

- (1) Personal luggage, unless including parcels of dutiable goods, which are included in the statistics.
- (2) Ship's stores, Military and Naval stores on board Government Vessels, and ballast of no commercial value.

Countries to which Imports and Exports are credited.—Imports are classified as received from the countries whence they were consigned. These countries are not in all cases the countries of actual origin, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to the Colony. In such a case the second country, being the country of last ownership, would be the "country whence consigned."

Exports are credited in the Tables to the country of "ultimate destination" (when known), *i.e.*, the country to which they are consigned, whether that country possesses a seaboard or not.

Method of ascertaining quantities and values of Imports and Exports.—The statements of quantities and values are based on the declarations of importers and exporters as subsequently checked by the Customs Officials. Where goods are entered by weight, the quantities shown as imported and exported represent the net weight exclusive of packages, sacks, casks, &c., in which they may be contained.

The values of imports are exclusive of the amount of duty and are "**c.i.f.**;" the values of exports are exclusive of export duty and are "**f.o.b.**"

Unenumerated Goods, Parcel Post and Bullion and Specie.—Unenumerated goods are divided into "Unmanufactured" and "Manufactured," and are placed in the Tables of imports and exports after all other goods recorded alphabetically, and before Parcel Post.

Imports by Parcel Post are not classified according to their nature but are separately recorded at the end of the Table of Imports, and are entered according to value.

7.—SUMMARY OF INDUSTRIAL DEVELOPMENT.

7. A summarised statement of any developments in the agricultural, forestal, fishing, mining, and other industries of the Colony during the year under review, with a statement as to progress up to date. A special account should be given of Government grants or other action for the development of the natural resources and industries of the Colony.

SUGAR.

Owing to the high prices prevailing during the period under review for sugar and its by-products, this industry received considerable attention from both planters and peasants. Their united efforts are reflected in the following figures which give the value and quantities of sugar products exported during the last two years :—

	1919.	Value.	1920.	Value.
Usine sugar (cwt.)	34,584	£46,720	74,779	£141,126
Muscovado sugar (cwt)	39,386	61,097	5,770	5,100
Molasses & Syrup (gallons)	68,324	4,950	199,366	28,160
Total		<u>£112,767</u>	Total	<u>£174,476</u>

The quantity of rum made at the local distilleries was as follows :—

1919—50,412 proof gallons valued at	...	...	£7,561
1920—51,597	„	„	£9,039

Special attention is directed to the very considerable and satisfactory increase made in the syrup industry. This is purely a peasant industry and the increase made in one year, viz: 131,042 gallons, with an increase in value of £23,210 clearly demonstrates once again how very willing and eager the peasants of this Colony are to return to cane cultivation when the conditions are favourable.

CACAO.

The decline in the export of cacao as shown by the table below must not be taken as a correct indication of the crop during the year.

The lack of shipping facilities and the general depression in the cacao market were contributory causes of this decline.

The normal annual production of cacao in this Colony is about 19,000 cwt. and its normal value somewhere in the neighbourhood of £57,000.

The shipments of cacao during 1919 and 1920 are as follows :—

1919—16,370 cwt. valued at	...	...	...	£75,185
1920— 8,966 „ „	...	...	...	£43,944

LIMES.

Limes and lime products of the total value of £12,894 were exported during the year. This being a fall in value of £1,699.

The total lime crop of the island, calculated in barrels of fruit since the establishment of the industry is as follows :—

1914—12,765 barrels.	1918—45,223 barrels *
1915—21,363 „	1919—42,537 „
1916—22,489 „	1920—48,508 „
1917—18,180 „	

COCONUTS.

Very considerable extension continues to be made in the areas devoted to coconut cultivation and the stage has now been reached when special attention is being devoted to the erection of artificial driers for the preparation of copra.

Notwithstanding the satisfactory increase made during the year in connexion with the exports of coconuts and copra as shown by the table below, this increase does not by any means represent the real progress that is being made in this industry. It is anticipated that within a very short period these exports will assume considerable proportions.

Exports of Coco-nuts and Copra.

	Quantity.			Value.
1919	Coconuts 181,956	...	...	£960
„	Copra 177 cwt.	...	...	355
1920	Coconuts 301,272	...	...	2,114
„	Copra 169 cwt.	...	...	292
